Degradation Fee

Degradation Fee Formula:

This formula covers degradation for depreciation caused by intrusion into the right-of-way. The depreciation applies to the original surface of the right-of-way and to the overlays and seal-coats applied to the surface. The formula includes life expectancy schedules for each and has an estimated cost per square yard based on the quality of the right-of-way surface required for different levels of traffic. This formula creates a degradation fee which is determined by the cost per square yard for street, overlay, and seal-coat, multiplied by the depreciation schedule, multiplied by the area of the street patch.

Degradation Fee:

(cost per square yard for street overlay and seal-coat x depreciation schedule rates) x area of street patch = degradation fee
